

Extraordinary events have affected the UK wholesale paper market over the past months, and these are set to continue throughout the year. With the recent industrial action in Finland, reduced production resulting from an earthquake in Chile, increased demand from Asia and the weakness of sterling against the dollar; price increases have become unavoidable.

Whilst we have absorbed many market price increases, we now have little option than to increase our prices from 1st June 2010, but will be continually monitoring the market to ensure our products remain competitive.

We offer discount for orders of 20 boxes or more. For prices of all other office papers, including coloured papers please refer to our website. A further price review is possible in September 2010.
